

Carter West Engineering CSWP

3D PRECISION LASER SCANNING

Reverse Engineering

Speed, accuracy and ease-of-use for aftermarket product design, automotive, electronics, machine, etc.

Packaging Design

Create custom packaging by scanning product samples for exact geometry and texture data

Ergonomic Design

Readily scan hand-crafted samples to produce complex designs from scratch

Digital Archiving

Save money by storing tooling, samples and prototypes digitally

Digital Media, Gaming & Animation

Create digital media for computer games and movies from artist's concept models

Arts & Cultural Heritage

Produce high-resolution, low-impact scans for accurate restorations and reconstructions of priceless artwork and architecture. Document, research and even replicate great works for transportation, packaging, museum shops and historical archiving.

Medical Education

Create highly detailed reproductions of complex organs and bone structures

Crime Scene Investigation

When the evidence can't come to court, 3D scanning is a high precision alternative to archiving the facts
